

# Table of Contents

Summary .....	i
Acknowledgements.....	v
List of Tables .....	vii
List of Figures .....	vii
1 Objectives .....	1
2 Background .....	3
2.1 Definition of Non-Residential Construction .....	4
2.2 Design Decision Making .....	4
2.3 Selection of Structural Materials .....	6
2.4 Wood in Design .....	9
2.4.1 Designers' Knowledge of Wood .....	11
2.4.2 How Wood is Treated in Building Codes.....	12
2.5 Existing Wood-use in U.S. Non-Residential Construction.....	14
3 Method .....	26
3.1 Pre-Survey Focus Group .....	26
3.2 Mail Survey of Structural Engineers and Architects .....	26
3.3 Post-Survey Focus Groups.....	27
4 Results .....	29
4.1 Respondents .....	29
4.2 Characterization of Building Design Practice.....	31
4.3 Structural Material Use .....	35
4.4 Favorability to Wood-use .....	41
4.5 Information Resources for Designers .....	55
4.6 The Structural Material Selection Process.....	58
4.7 Environmental Issues .....	65
4.8 Comparison of Results to the Kozak/Cohen 1993 Non-residential Survey .....	69
5 Implications .....	72
5.1 Building Codes .....	72
5.2 Performance .....	73
5.3 Products .....	74
5.4 Design/Construction Culture.....	76
5.5 Promotion/Education/Extension.....	76
5.5.1 Promotion/Education/Extension .....	76
5.5.2 Geographical Considerations.....	79
5.5.3 Individuals to Target.....	79
5.5.4 Building Types to Target .....	79
6 References.....	82
Appendix 1. Focus Groups .....	84
Appendix 2. Survey.....	106
