POSITION ANNOUNCEMENT
Technical Services Division

Staff Engineer in Timber Engineering

APA is seeking a Staff Engineer in Timber Engineering for the Tacoma, Washington laboratory. As a Staff Engineer for APA, one will use their engineering degree or other degree in a related field and practical experience in timber engineering, construction, or building code development to advance the engineered wood industry.

Responsibilities:
This key position will be responsible for the following key activities at APA’s Technical Services Division:

• Develop or update APA recommendations for engineered wood products based on the latest building codes and standards.
• Conduct product or assembly testing, evaluation, and research.
• Prepare test reports based on data analysis or engineering.
• Perform engineering services for the public and APA members.
• Participate in the activities of building code and standard development.
• Participate in committee activities relevant to the needs of the APA membership.
• Interact with the staff of other organizations on technical issues.

Substantial opportunities exist for professional growth through regular contacts with the forest products industry, scientific/engineering community, regulatory agencies, and other research organizations throughout the world.

Qualifications:
An M.S. or advanced degree in engineering or other related fields, with a minimum of 2 years of practical experience in timber engineering or construction, or in building code development, is required. An E.I.T. or P.E. certificate or field experience in wood-frame building construction is a plus. The candidate must be willing to conduct testing in the lab, in addition to periodic travel, both domestically and internationally, and must be self-motivated and a team player.

The Company:
APA is a non-profit trade association whose members manufacture the majority of the structural wood panel products manufactured in North America, plus a host of engineered wood products that include plywood, oriented strand board, glued laminated timber (glulam), cross-laminated timber (CLT), wood I-joints, structural composite lumber, and mass timber.
Compensation and Benefits:
The salary range for this position is $75,000 to $133,200 annually. The starting rate is dependent upon experience. Benefits include:

- Paid vacation starting at 2 weeks per year.
- Paid sick leave accruing at 12 days per year.
- 401(k) Retirement Plan.
- Medical, dental and vision for employee and dependents.
- Life and Accidental Death & Dismemberment insurance.
- Employee Long-Term Care insurance.
- Long-Term Disability insurance.
- Employee Identity Theft Protection.

The complete job description is available upon request.

The Company:
