

POSITION ANNOUNCEMENT
President
APA – The Engineered Wood Association

President
Tacoma, WA

Responsibilities:

For more than 85 years, APA–The Engineered Wood Association has focused on helping the industry create structural wood products of exceptional strength, versatility, and reliability. Combining the research efforts of scientists at APA’s 42,000 square-foot research center with the knowledge gained from decades of field work, and cooperation with member manufacturers, APA promotes new solutions and improved processes that benefit the entire engineered wood industry.

APA is a member driven organization and the new President will continue to ensure that the association remains responsive to member needs and is attentive to how APA can best deliver programs. They will be a tireless and passionate advocate for why wood products are effective, safe, and a sustainable option for building in North America. Engineered wood products are evolving, with new and exciting technological innovations changing the way products can be used and the new President will be a strategic thinker who can ensure the organization is well positioned to handle these and future trends.

Qualifications:

As an ideal candidate, you are a strong communicator, a skilled networker, and facilitator. You are an accomplished leader of teams who creates an environment that encourages succession planning, rewards hard work, and creates a positive workplace environment. You understand how to navigate and achieve results within multi-stakeholder environments and are collaborative, approachable, and skilled at finding common ground when faced with a complex issue. You possess sound financial management skills and excellent business acumen and will ensure that APA is lean and efficient but mighty in terms of the impact it has for members.

The Company:

APA-The Engineered Wood Association is the premier industry trade association representing the majority of the North American producers of glued, engineered wood products. Our member companies represent 85% of structural wood panels, 80% of glulam beams, 70% of I-joists and 72% of laminated veneer lumber manufactured in the US and Canada. We provide testing and grade certification, publish and distribute technical literature, research new products and applications and support members in penetrating and expanding markets.

The average length of service for an APA employee is 12 years. We offer competitive compensation and a comprehensive benefits program including health, life and LTD insurance, paid leave and holidays, 401(k) retirement program, tuition and wellness reimbursement programs.

To explore this exciting opportunity, please submit your application and related materials to Eric Lathrop and Ron Burkholder at rburkholder@boyden.com and **state the title of the position in the subject line of your e-mail.**

We thank all applicants for their interest, however only those under consideration for the role will be contacted.
