Date: September 2, 2010

To: PRS-610.1 Standards Committee Members

It has been a while since the last activity of this committee. As you might recall, the first committee ballot for this standard was issued in June 2009 and a total of 195 comments were received. Since then, a task group composed of the key negative voters and industry representatives has been formed. The task group met at the ICC-ES Whittier CA office with an effort to resolve some fairly substantial comments last year. The meeting notes from the task group meeting are attached. However, due to the complexity of the issues raised by the ballot comments and the global economy depression, the progress of the standard development has been slow.

Recently, Tom Williamson, the SIPA TAC Chair, and I had a chance to review this standard activity (or lack of). It was determined that there is still interest by the industry to move forward with this standard. As a result, we incorporated numerous changes from Ballot #1 based on the task group meeting notes and prepared the attached Ballot #2. We believe this ballot has addressed most significant negative comments from Ballot #1 and is ready for another ballot. With the consent of the Committee Chair, Jim Whalen, Ballot #1 has been withdrawn and the attached new Ballot #2 is being issued to the entire Committee. A redlined document is also attached for the committee members who may be interested in the tracked changes from Ballot #1.

Please e-mail your votes to me by **October 4, 2010 (Monday)** using the attached ballot form (Word file).

It should be noted that according to the Committee Operating Procedures, the committee membership may be terminated for failure to return 3 consecutive Committee ballots. The following committee members did not return the last ballot:

Scott Bergford, Julie Bregulla, Larry Brown, Joe Hagerman, Mike Kingsmore, Paul Kurtanich, Matt Lansdowne, Vince McClure, Khalid Mosalam, Damian Pataluna, Dave Rogne, Lorraine Ross, Susan Strong, and Chris Whelan

I look forward to your ballot return. In the meantime, please let me know if there are any questions on this ballot.
