1. Basis of the product report:
   - 2018 and 2015 International Residential Code (IRC): Section R610 Structural Insulated Panel Wall Construction
   - 2012 and 2009 IRC: Section R613 Structural Insulated Panel Wall Construction
   - Performance Standard for Wood-Based Structural-Use Panels, PS 2
   - APA Reports T2008P-40A, T2008P-78A, and T2018P-32, and other qualification data

2. Product description:
   Tolko proprietary OSB facers are 7/16 Performance Category panel sheathing that can be used as facers of structural insulated panels (SIPs) when manufactured to a proprietary mill specification documented in the in-plant manufacturing standard and approved by APA. In addition to the requirements for PS 2, the proprietary OSB facers meet the higher properties specified in Table R610.3.2 of the 2015 IRC, Table R613.3.2 of the 2012 and 2009 IRC, and Table 2 of ANSI/APA PRS 610.1, as shown in Table 1 of this report. The properties of the Tolko proprietary OSB facers are quality-controlled on an on-going basis.

3. Minimum panel properties:
   Tolko OSB facers meet the properties specified in Table 1.

   Table 1. Minimum Properties for Tolko proprietary OSB Facers (a)

<table>

</tbody>
</table>

   For SI: 1 lbf-in.²/ft = 9.415 x 10⁻⁶ kN-m²/m, 1 lbf-in./ft = 3.707 x 10⁻⁴ kN-m/m, 1 lbf/ft = 0.0146 N/mm, 1 pcf = 16.018 kg/m³

   (a) Tabulated values are test values, which are not intended for use in design.
   (b) Mean test value shall be in accordance with Section 7.6 of PS 2.
   (c) Characteristic test value (5th percentile with 75% confidence).
   (d) Mean density value shall be based on oven-dry weight and oven-dry volume in accordance with Method A of ASTM D2395.

4. Limitations:
   a) The properties listed in Table 1 are minimum test values and related only to the Tolko proprietary OSB facers. Design values for SIPs shall be provided by the SIP manufacturer.
   b) Tolko proprietary OSB facers are limited to dry service conditions where the average equilibrium moisture content of sawn lumber is less than 16 percent.
   c) Tolko proprietary OSB facers are produced by Tolko Industries Ltd., High Prairie, Alberta, Meadow Lake Division in Meadow Lake, Saskatchewan, and Athabasca Division in Slave Lake, Alberta, under a quality assurance program audited by APA.
d) This report is subject to re-examination in one year.

5. Identification:
   Tolko proprietary OSB facers recognized in this report are identified by a label bearing the manufacturer's name and/or trademark, the APA assigned plant number (450 for the High Prairie facility, 492 for the Meadow Lake facility, and 514 for the Slave Lake facility), the product Performance Category (7/16), the Span Rating (24/16), the Exposure Rating, the APA logo, the report numbers PR-N614, and a means of identifying the date of manufacture.
