West Fraser Proprietary OSB Facers for SIPs
West Fraser Timber Co. Ltd.

Product: West Fraser 7/16 Proprietary OSB Facers for SIPs
West Fraser Timber Co. Ltd., 885 West Georgia Street, Suite 1500, Vancouver, British Columbia, V6C 3E8, Canada
(604) 895-2700
osb.westfraser.com

1. Basis of the product report:
   - 2021, 2018 and 2015 International Residential Code (IRC): Section R610 Structural Insulated Panel Wall Construction
   - 2012 IRC: Section R613 Structural Insulated Panel Wall Construction
   - DOC PS 2-18, Performance Standard for Wood Structural Panels
   - ANSI/APA PRS 610.1-2023, Standard for Performance-Rated Structural Insulated Panels in Wall Applications
   - APA Reports T2010P-44, T2020P-03, and T2023P-48, and other qualification data

2. Product description:
   West Fraser proprietary OSB facers are 7/16 Performance Category panel sheathing that can be used as facers of structural insulated panels (SIPs) when manufactured to a proprietary mill specification documented in the in-plant manufacturing standard and approved by APA. In addition to the requirements for PS 2, the proprietary OSB facers meet the properties shown in Table 3 of this report, which are equal to or higher than those specified in Table 2 of ANSI/APA PRS 610.1 as referenced in the 2021 and 2018 IRC, Table R610.3.2 of the 2015 IRC, and Table R613.3.2 of the 2012 IRC. The proprietary OSB facers are also listed in APA Product Report PR-N610. Products may be treated with Borogard® ZB (registered trademark of U.S. Borax; an EPA-registered zinc borate preservative), as recognized in APA Product Report PR-N213. The efficacy of the preservative treatment is outside the scope of this report and the APA certification program. The properties of the proprietary OSB facers are quality-controlled on an on-going basis.

3. Minimum panel properties:
   West Fraser proprietary OSB facers meet the properties specified in Table 1.

Table 1. Minimum Properties for West Fraser Proprietary OSB Facers

<table>
<thead>
<tr>
<th>Thickness (in.)</th>
<th>Flatwise Stiffness (b) (lbf-in.²/ft)</th>
<th>Flatwise Strength (c) (lbf-in./ft)</th>
<th>Tension (c) (lbf/ft)</th>
<th>Density (d) (pcf)</th>
</tr>
</thead>
<tbody>
<tr>
<td>7/16</td>
<td>Along 55,600</td>
<td>Across 27,100</td>
<td>Along 1,040</td>
<td>Across 870</td>
</tr>
</tbody>
</table>

For SI: 1 lbf-in.²/ft = 9.415 x 10⁻⁶ kN-m²/m, 1 lbf-in./ft = 3.707 x 10⁻⁴ kN-m/m, 1 lbf/ft = 0.0146 N/mm, 1 pcf = 16.018 kg/m³

(a) Tabulated values are test values, which are not intended for use in design.
(b) Mean test value shall be in accordance with Section 7.6 of PS 2.
(c) Characteristic test value (5th percentile with 75% confidence).
(d) Mean density value shall be based on oven-dry weight and oven-dry volume in accordance with Method A of ASTM D2395.
4. Limitations:
   a) The properties listed in Table 1 are minimum test values and related only to the West Fraser proprietary OSB facers. Design values for SIPs shall be provided by the SIP manufacturer.
   b) West Fraser proprietary OSB facers are limited to dry service conditions where the average equilibrium moisture content of sawn lumber is less than 16%.
   c) West Fraser proprietary OSB facers are produced by West Fraser Timber Co. Ltd. at the facilities in Barwick, ON, Guntown, MS, and Lanett, AL, under a quality assurance program audited by APA. The efficacy of the preservative treatment is outside the scope of this report and the APA certification program.
   d) This report is subject to re-examination in one year.

5. Identification:
   West Fraser proprietary OSB facers recognized in this report are identified by a label bearing the manufacturer’s name and/or trademark (West Fraser), the APA assigned plant number (498 for Barwick, ON, 502 for Guntown, MS, and 503 for Lanett, AL), the product Performance Category (7/16), the Span Rating (24/16), the Exposure Rating, the APA logo, the report number PR-N612, and a means of identifying the date of manufacture.
